Fig. 1

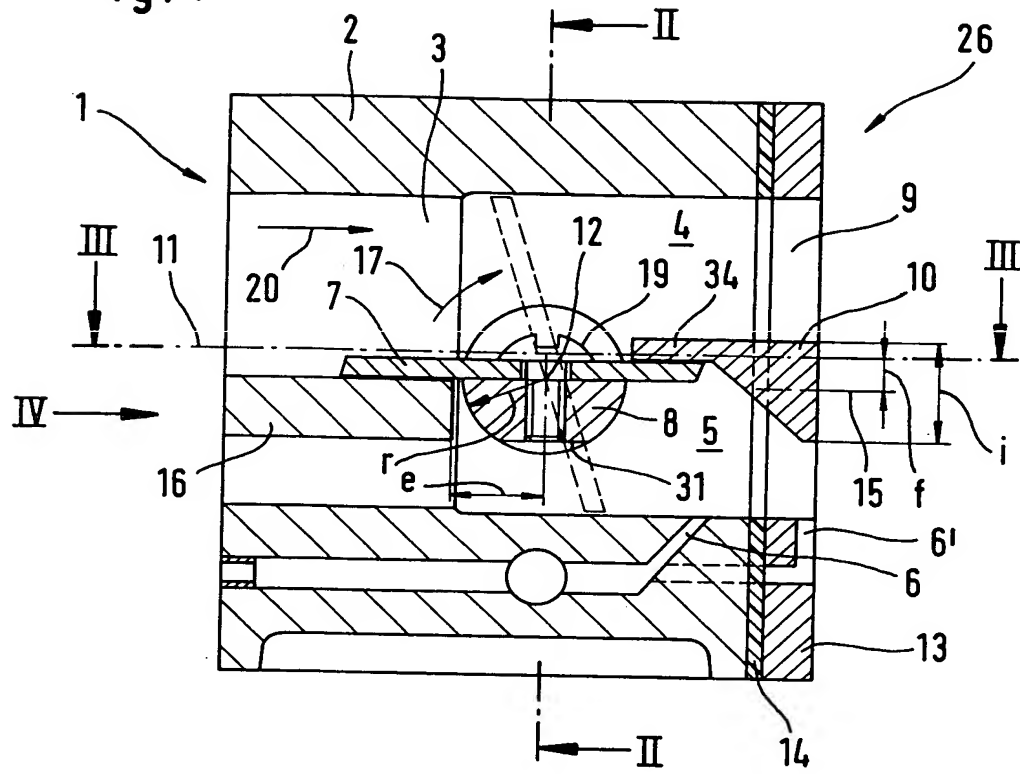

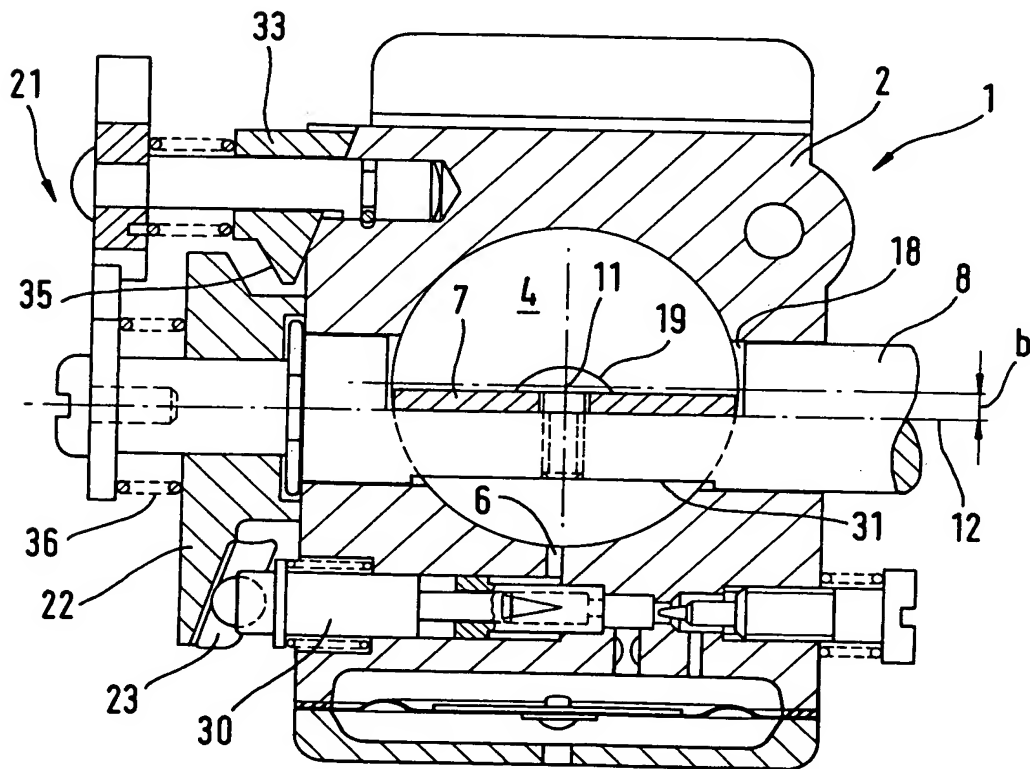

Fig. 2

A diagram of a circular structure, possibly a cross-section of a dome or a similar architectural element. The structure is divided into two main parts by a horizontal dashed line. The upper part is a semi-circle, and the lower part is a semi-circle. The entire structure is enclosed within a rectangular frame. The diagram includes several numbered labels: '2' is in the upper right corner; '9' is at the top center; '11' is inside the upper semi-circle; '4' is on the right side of the upper semi-circle; '16' is on the left side of the lower semi-circle; and '5' is inside the lower semi-circle. A vertical dashed line runs through the center of the structure. A diagonal line with arrows at both ends passes through the center, extending from the top left to the bottom right.
